Introduction

Motivated 3rd-year Computer Science Engineering student at Thapar University with skills in Data Structures, Algorithms, and software projects. Completed a 10-month internship at Tata Timken and have practical exposure from family transportation business. Interested in sports and photography with good problem-solving and teamwork abilities.

Education

Thapar Institute of Engineering and Technology, Patiala, Bachelors in Computer Science (Batch of 2027) Sept 2024 – Present

Work Experience

TIMKEN Sept 2023 – July 2024

- Gained hands-on experience in manufacturing operations, including bearings production, assembly line workflow, and quality checks.
- Assisted in process monitoring, data analysis, and identifying bottlenecks, contributing to operational efficiency.
- Strengthened understanding of supply chain and logistics by observing raw material flow, dispatch processes, and industrial coordination.

Certifications

- **TIMKEN Internship Certificate** – Hands-on experience in manufacturing operations and quality processes.
- **Cloud Computing Workshop:** Conducted by Thapar Institute of Engineering and Technology.
- **Introduction to Cybersecurity:** Get the certification from Cisco.

Projects

Transpolink Bharat July 2025 – Oct2025

- Developed a B2B & B2C logistics platform enabling real-time cargo transport solutions between truck owners, drivers, and businesses.
- Implemented route-based load matching, KYC verification, role-based dashboards, multilingual interface, and secure communication features.
- Enhanced transparency and trust with shipment tracking, ratings/feedback system, and end-to-end encryption for seamless operations.

Movie Recommendation System Jan 2025–Feb2025

- Designed a recommendation engine that suggests movies based on user input and preferences.
- Applied content-based filtering with genre similarity and Cosine Similarity to generate personalized results.
- Utilized Python (Pandas, NumPy) for efficient data handling and accurate recommendation performance.

Skills

Technical Skills

- Programming Languages: C++, Python, C, JavaScript
- Frameworks: HTML, CSS (Tailwind), JavaScript, React.js, Flutter (Dart), Figma, Responsive Design, UI/UX Prototyping, Basic Animations
- Core Competencies: Data Structures & Algorithms
- Coursework: Object-Oriented Programming, Design & Analysis of Algorithms, Database Management Systems, Operating Systems, Artificial Intelligence, Cognitive Computing, Computer Networks, Discrete Mathematics
- Additional Interests: Sports event management, Photography, Business exposure in logistics & transportation
